Mixer and blender (additives and masterbatch) check

Do this before each batch or at the start of each shift. Many additives, pigments and powders are hazardous, so check your COSHH assessments and safety data sheets.

Site		**Asset / ID**	
Date		**Time**	
Checked by		**Signature**	

#	Check	Pass	Fail	Notes
1	Lid closed and interlock stops the mixer when opened			
2	Blades / agitator secure and not damaged			
3	Discharge valve and chute guards in place			
4	Seals and gaskets intact, no powder leaks			
5	Dust extraction (LEV) switched on and drawing air			
6	Earthing / bonding in place for powders that can build static			
7	Additive and pigment containers labelled and lids on			
8	Safety data sheets and COSHH assessment available			
9	Correct RPE, gloves and eye protection available and worn			
10	Spill kit available, no spilled powder on the floor			
11	Emergency stop works			

Defects found and action taken:

These are general checklists. Always follow the manufacturer's instructions and your own risk assessment, and adapt the items to your equipment. They don't replace expert inspections required by law or guidance, such as LOLER thorough examinations or annual racking inspections.
